

### List of Reef Fishes of Raja Ampat

This list includes all species of shallow (down to 70 m depth) coral reef fishes.

Extracted from:

- Allen, G.R. and M.V. Erdmann. 2021. Reef Fishes of the East Indies. Conservation International Foundation.
- Erdmann, M.V. 2022. A list of Reef Fishes from the Bird's Head Seascape (BHS).
- Froese, R. and D. Pauly (eds.). 2023. FishBase. World Wide Web electronic publication. [www.fishbase.org](http://www.fishbase.org), version (06/2023).

The phylogenetic sequence of the families appearing in this list follows Eschmeyer (Catalog of Fishes, California Academy of Sciences, 1998) with slight modification. Genera and species are arranged alphabetically within each family. Species not previously reported in the literature from the BHS are indicated by an asterisk (\*) after the species and author names.
